

## Summit Natural Gas of Maine is Committed to Maine, its People and its Workforce

Summit Natural Gas of Maine is excited to bring natural gas to communities in the Kennebec Valley, a project that will help residents, families and businesses save up to 50 percent on heating costs.

### About our project:

Summit Natural Gas of Maine, headquartered in Augusta, specializes in bringing natural gas – a lower-cost, cleaner and more sustainable energy source – to regions of Maine that have previously been unable to obtain natural gas service.

The Kennebec Valley project involves the investment of \$350 million in infrastructure that will bring natural gas to communities across the region.

The project will have a lasting economic impact on the Kennebec Valley, creating more than 435 construction jobs. In the coming weeks, our Augusta office will be hiring 45 non-construction full-time employees.

As a result of our investment, more than \$250 million is expected to be generated for local plumbing, electrical and heating professionals who will be hired directly by customers that convert to natural gas.

Residents can save up to an estimated \$1,500 a year. Summit Natural Gas of Maine will provide residential customers with the best incentives and rebates as part of our conversion assistance program.

For local businesses, it is estimated that switching to natural gas will save small- to mid-sized businesses up to \$5,000 a year.

When customers are ready to make the switch to natural gas, our company will provide a free Home Energy Audit to help homeowners and businesses maximize their heating efficiency.

We continue to explore opportunities to serve other Maine communities currently unable to take advantage of natural gas, a lower-cost, cleaner and more sustainable energy source.

*We are focused on doing the best we can to help Maine families, businesses, and communities.*
